Documentation Evangelist

Representing my team effectively, building cross-team relationships, liaising with clients

Tech Facilitator

Simplifying complex topics, being a quick learner, training teammates

Decision Maker

Anticipating risks, balancing perfection with viability, choosing practical solutions

LANGUAGES

English: Fluent
French: Fluent
Portuguese: Native
Spanish: Advanced
Italian: Intermediate

ABOUT ME

I'm a Senior Technical Writer with 7 years of experience turning complex computing concepts and procedures into accessible, user-focused documentation. Currently at Deel, writing and testing integration documentation and building AI-assisted content workflows. Looking for hybrid opportunities (~3 days remote / 2 days in-office) in the Paris region, or roles in Thailand or South Korea.

EXPERIENCE

Senior Technical Writer — Deel

Jan 2026 – Now

At Deel, I focus on closing content gaps and making integrations easier to set up correctly the first time.

- Write and test documentation for Deel's third-party integrations — setup, configuration, and data mapping
- Validate integration workflows hands-on before publishing, catching setup issues and edge cases ahead of release
- Build cross-tool automation workflows using Akai, Deel's internal AI solution, to close content gaps at scale
- Identify and prioritize documentation gaps, working with Product and Engineering to scope new content

Lead Technical Writer — Scaleway

2020 – Dec 2025

As a **technical writer**, I:

- Wrote and reviewed technical documentation for all of Scaleway's products and services — how-tos, tutorials, FAQs, quickstarts, concepts, troubleshooting, and API reference
- Wrote UX copy for the Scaleway console

As a **technical lead**, I:

- Led retrospectives and team weeklies; managed the team Jira board and stakeholder requests
- Created and led **Train the Docs**, an internal workshop series on Python, Terraform, diagramming, and prompt engineering
- Supported the build and ongoing QA of Scaleway's documentation AI assistant

Inside Sales — Scaleway

2019 – 2020

- Supported pre-sales project requests in collaboration with Cloud Solution Architects
- Identified sales opportunities and managed customer-facing content and responses

Customer Happiness Specialist — IFESP, São Paulo, Brazil

2018

- Structured the Customer Success process; defined KPIs, BPMN diagrams, and feedback loops
- Produced e-learning and SEO content for blogs, videos, and podcasts
